

January 22,2021

Dear Family Members,

Yesterday, we were informed that another staff member tested positive for COVID-19. Since this person does not work with the Residents, we were not obliged to put the Residents in isolation under contact and droplet precautions in their rooms.

We do however have to test them once weekly for COVID-19 for another 14 days. This also pushes the visitation date further out. We currently have 4 staff members furloughed. Happily, one more member of the nursing staff was able to return to work this week.

All Residents were tested yesterday and we expect their results by Saturday. So far, no one has any symptoms of COVID-19.

Sincerely,

Sr. Gertrude Mary lsp
